DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4-5 and 7-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Oyama et al., U.S. Patent No. 4,643,038 (hereinafter "Oyama"). Oyama teaches an acrylonitrile/butadiene/butyl acrylate copolymer. See Oyama, Table 1, Polymer G. Thus, Oyama anticipates claims 1, 4-5 and 7-8.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the

Art Unit: 1713

art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. Claims 2-3, 6 and 9-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Oyama et al., U.S. Patent No.

4,643,938 (hereinafter "Oyama"). Oyama teaches a copolymer comprising: (1) unsaturated nitrile units; (2) conjugated nitrile units; (3) units derived from an ethylenically unsaturated monomer other than unsaturated nitriles and/or units formed by hydrogenating units derived from conjugated dienes.

See Oyama, col. 1, lines 28 through col. 2, lines 36.

6. The basic requirements of prima facie case of obvious are:
(1) there must be some suggestion or motivation, either in the

Art Unit: 1713

reference themselves or in the knowledge generally available to one of ordinary skill in the art, to modify the reference or to combine reference teachings; (2) there must be a reasonable expectation of success; (3) the prior art reference (or references when combined) must teach or suggest all the claim limitations. See MPEP 2143. "There are three possible sources for a motivation to combine references: the nature of the problem to be solved, the teachings of the prior art, and the knowledge of persons of ordinary skill in the art." See In re Rouffet, 149 F.3d 1350, 1357, 47 USPQ2d 1453, 1457-58 (Fed. Cir. 1998). Although Oyama does not disclose in the working examples copolymers of acrylonitrile/butadiene/butyl acrylate copolymer with the claimed monomer compositions, based on the specification as a whole a polymer chemist of ordinary skill in the art would be motivated to modify Oyama by preparing acrylonitrile/butadiene/butyl acrylate copolymer with a wide array of monomer compositions. Such modification would be obvious because one would have a reasonable expectation of success that acrylonitrile/butadiene/butyl acrylate copolymer as taught by Oyama would be similarly useful and applicable to acrylonitrile/butadiene/butyl acrylate copolymer polymers. Therefore, claims 2-3, 6 and 9-10 are deemed as being unpatentable over Oyama.
